## Now Even Smarter and Faster A New Generation Beyond PM84

### Performance Upgrade – Faster, Smoother, More Responsive

To meet evolving market requirements, PM84P is equipped with a Qualcomm Octa-core processor, delivering faster, smoother performance than its predecessor. The operating system has been upgraded to Android 15 (upgradable to Android 18), providing improved stability, enhanced security, and better application performance. These enhancements enable PM84P to handle intensive enterprise workflows efficiently and responsively.

### Key Feature Enhancements Over PM84

Building on the foundation of the PM84, PM84P introduces meaningful upgrades to support broader and more demanding business workflows. It now offers 4GB or 8GB RAM options, giving enterprises flexibility to match performance with operational needs. Bluetooth 5.3 ensures faster pairing, improved stability, and better energy efficiency. Additionally, an integrated RFID Tag for simplified device identification and asset tracking.\*

### Precision Scanning for Every Condition

Equipped with a next-generation 2D scan engine, PM84P delivers fast, precise, and reliable barcode capture across a wide range of real-world conditions. Whether scanning damaged, low-contrast, high-density, or moving barcodes, the upgraded engine ensures high accuracy and rapid decoding, enabling smooth workflows with minimal interruptions.

### Designed for Seamless Continuity

PM84P maintains compatibility with PM84 accessories, allowing businesses to carry forward existing investments without additional hardware costs. Its ECO Design-compliant battery delivers stable, long-lasting power while reducing environmental impact. Combined with the familiar industrial design, PM84P integrates naturally into current operations—minimizing retraining and maintaining productivity from day one.
